A & N Islands	95	95	5	2	95	8	13	10	6	27
Lakshadweep	51	32	0	0	46	0	0	9	7	27

Indicator Range for positive Indicators	0.0-24.9 %	25.0 - 49.9 %	50.0 - 74.9 %	75.0 -95.0 %
Indicator Range for negative Indicators	75.0 -95.0 %	50.0 - 74.9 %	25.0 - 49.9 %	0.0-24.9 %

1. Maternal Nutrition Index: The index is calculated as the simple mean of seven selected coverage key performance indicators. **Indicators viz. 1.4.1, 1.4.4, 1.5.1, are taken as positive indicators. Indicators viz. 1.4.2, 1.4.3, 1.5.2 and 1.3.1 are taken as negative indicators.**
 2. Numerators & Denominators are from HMIS Standard Report 2019-20 (up to December 2019).
 3. States/UTs are ranked based on the Maternal Nutrition index with State/UT having highest index value ranked First and so on.
- *95 % is considered as the ceiling value for HMIS coverage for States/UTs.

About Maternal Nutrition Score Card:

In India, despite of substantial reduction in MMR (22% decline in maternal mortality ratio (MMR), from 167 (2011-2013) to 130 (2014-2016) deaths per 100,000 live births), progress on maternal malnutrition and its related adversities has been slow. The WHO has placed substantial emphasis on nutrition assessment and provision of a set of nutrition interventions including provision of balanced energy protein supplementation, iron folic acid (IFA), and calcium supplementation, deworming, gestational weight gain monitoring and counselling on nutrition, family planning and breastfeeding coupled with efforts to prevent and treat maternal infections and anemia.

The Maternal Nutrition Score Card is developed with an objective to provide information on coverage of test and treat services for hemoglobin, blood sugar and hypertension across pregnant women to support assessment of progress and performance of the program. The Score Card is based on data from Health Management Information System (HMIS). The rankings are calculated as test and treat services for hemoglobin, blood sugar and hypertension supplementation across selected target beneficiaries. State/UT are ranked in descending order of the mean coverage whereby State/UT with best performance is ranked first.

This scorecard is prepared by Institute of Economic Growth (IEG) in collaboration with UNICEF.
