AMB Index 2020-21
(Aspirational Districts)

- 0.0 – 24.9%
- 25.0 – 49.9%
- 50.0 – 74.9%
- 75.0 – 95.0%

Indicator Range 0.0 - 24.9% 25.0 - 49.9% 50.0 - 74.9% 75.0 - 95.0%

The AMB Score Card is developed with an objective to provide information on coverage of IFA supplementation across selected target beneficiaries to support assessment of progress and performance of the program. The AMB Score Card is based on data from Health Management Information System (HMIS) and AMB Dashboard. The rankings are calculated as the mean coverage of IFA supplementation across selected target beneficiaries. Districts are ranked in descending order of the mean coverage whereby Districts with best performance is ranked first.

This scorecard is prepared by Institute of Economic Growth (IEG), Delhi in collaboration with UNICEF.

- i) AMB Index: The Index is calculated as the simple mean of the five selected coverage key performance indicators.
- ii) Numerators are from HMIS Standard Report 2020-21 (up to November 2020-21). The Denominators are from Anemia Mukta Bharat - Dashboard (FY 2020-21). The denominator for indicator 4 (Registered Pregnant Women) is from HMIS Standard Report (FY 2020-21). The numerators and denominators account for monthly consumption frequency for indicators related to children: 6-59 months, 5-9 years, 10-19 years and lactating women.
- iii) States/UT's are ranked based on AMB index with District having highest index value ranked first and so on.
- iv) Status as on December 15, 2020. Data are provisional, reported by States/UTs in HMIS.
- * 95% is considered as the ceiling value for HMIS coverage for States/UTs.
- # The HMIS data item code as per standard report is as follows:
 1. Percentage of children 6-59 months provided 8-10 doses (1ml) of iron and Folic Acid (IFA) syrup (Bi weekly)
 2. Percentage of children covered under (5-9 years) provided 4-5 iron and folic acid (IFA) tablets (In schools + out of school)
 3. Percentage of (10-19 yrs) provided 4 Iron and Folic Acid (IFA) tablets (In schools + out of school)
 4. Percentage of Pregnant Women (PW) given 180 iron and folic acid (IFA) tablets
 5. Percentage of Lactating Women (LW) given 180 iron and folic acid (IFA) tablets
