

# ANEMIA MUKT BHARAT

WEBINAR SERIES-6

## Pediatric Anemia in India: Current Scenario, Challenges, and Solutions

Co-hosted by National Centre of Advanced Research and Anemia control (NCEAR-A) & Pediatric and Adolescent Nutrition Society (PANS)

Ministry of Health and Family Welfare, Government of India, has launched the Anemia Mukta Bharat (AMB) program in 2018 with an ambitious target of three percent annual reduction in the burden of anemia. AMB recognized research as an important component under AMB and hence established the National Centre of Excellence and Advanced Research on Anemia Control (NCEAR-A) at All India Institute of Medical Sciences (AIIMS), New Delhi, to support the AMB program in incorporating scientific and community perspectives for control of anemia.

This webinar on “Pediatric anemia in India: Current Scenario, Challenges and Solutions” intends to feature diverse speakers who have committed themselves to core areas of pediatrics and anemia and simultaneously share the recent updates, challenges, unknown areas for exploration and pathways to translate research into policy and program.

**Outcome:** The webinar will encourage mutual learning among the researchers and pediatricians and will support the program managers and policymakers in the decision making. The deliberations from the webinar will be collated by the NCEAR-A and will support the cause of pediatric anemia under AMB.

**Note:**

- Questions can be submitted to [nceara.aiims@gmail.com](mailto:nceara.aiims@gmail.com) or can be raised during the webinar.
- All presentations will be made available at <https://anemiamukt Bharat.info/resources/>
