Indicator Range for Positive Indicators	0.0 – 24.9%	25.0 – 49.9%	50.0 – 74.9%	75.0 – 95.0%
Indicator Range (reverse for negative indicators)	75.0 – 95.0%	50.0 – 74.9%	25.0 – 49.9%	0.0 – 24.9%
Indicator Range for Severe Anemia	4 or more %	3.0 – 3.9%	2.0 – 2.9%	1.9 or less %

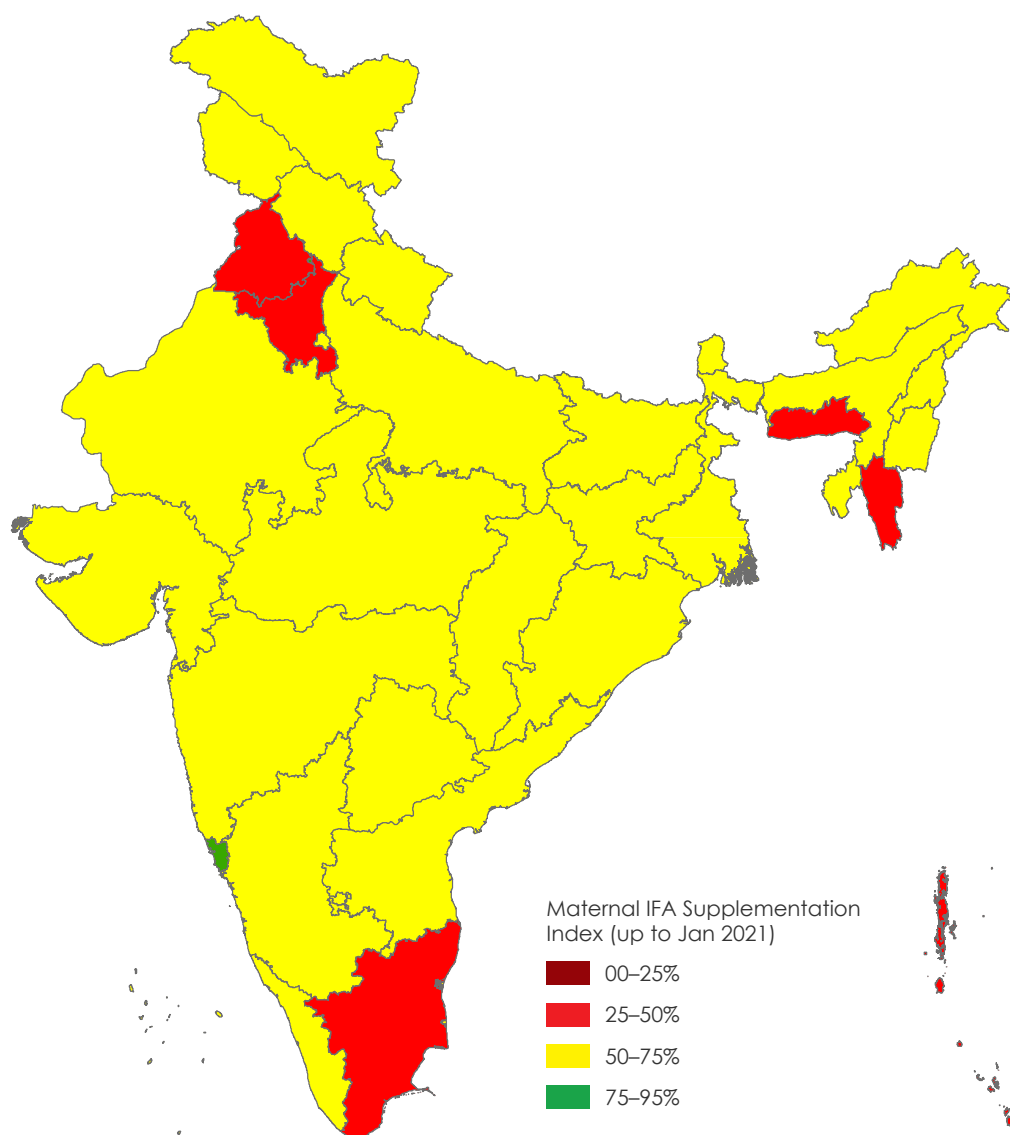

1. Maternal Nutrition Index: The index is calculated as the simple mean of six selected coverage key performance indicators. The indicators of Anemia Prevalence are taken as negative indicators while the remaining are taken as positive indicators.

2. Numerators & Denominators are from HMIS Standard Report 2020-21 (up to January 2021).

3. States/UTs are ranked based on the Maternal Nutrition index with State/UT having highest index value ranked first and so on.

* 95 % is considered as the ceiling value for HMIS coverage for States/UTs.

Maternal IFA Supplementation Index, 2020-21 (up to January 2021)

A & N Islands	49	9

About IFA Supplementation Score Card

In India, despite of substantial reduction in MMR (22% decline in maternal mortality ratio (MMR), from 167 (2011-2013) to 130 (2014-2016) deaths per 100,000 live births), progress on maternal malnutrition and its related adversities has been slow. The WHO has placed substantial emphasis on nutrition assessment and provision of a set of nutrition interventions including provision of balanced energy protein supplementation, iron folic acid (IFA), and calcium supplementation, deworming, gestational weight gain monitoring and counselling on nutrition, family planning and breastfeeding coupled with efforts to prevent and treat maternal infections and anemia.

The Maternal IFA Supplementation Score Card is developed with an objective to provide information on coverage of IFA in pregnancy and lactation period, test and treat services for hemoglobin across pregnant women to support assessment of progress and performance of the maternal nutrition interventions. The Score Card is based on data from Health Management Information System (HMIS). State/UT are ranked in descending order of the mean coverage whereby State/UT with best performance is ranked first.

This scorecard is prepared by Institute of Economic Growth (IEG) in collaboration with UNICEF.
